- A. Tesla's Patent**
- B. Art Simulation**
- C. Art Simulation**

"Nikola Tesla invented or developed many of the electrical technologies which form the basis of modern life, including: alternating-current (AC) power transmission and electric motors; high-frequency (HF) communications, the basis for radio and television; neon lighting; remote radio-control; and X-rays. But his visionary genius and technical skill was countered by his lack of business acumen and eccentric personality. After dying penniless in 1943, his 'missing papers' regarding the construction of a 'death ray' became the focus of international intrigue. His research on particle beam weapons led to several American and Soviet military research programs, including the Strategic Defense Initiative, known as SDI or 'Star Wars'. "["Tesla Master of Lightning"](#), PBS, April 2004 also see: [IMDb, "Tesla Master of Lightning"](#).

"By 1937 it was clear that war would soon break out in Europe. Frustrated in his attempts to generate interest and financing for his 'peace beam,' he sent an elaborate technical paper, including diagrams, to a number of Allied nations including the United States, Canada, England, France, the Soviet Union, and Yugoslavia. Titled 'New Art of Projecting Concentrated Non-Dispersive Energy Through Natural Media,' the paper provided the first technical description of what is today called a charged particle beam weapon. Of all the countries to receive Tesla's proposal, the greatest interest came

from the Soviet Union. In 1937 Tesla presented a plan to the Amtorg Trading Corporation, an alleged Soviet arms front in New York City. Two years later, in 1939, one stage of the plan was tested in the USSR and Tesla received a check for \$25,000." [Wikipedia: Teleforce](#)

#### **D. High Frequency Active Auroral Research Program (HAARP)**

"The HAARP Program is jointly managed by the US Air Force and the US Navy, and is based in Gakona, Alaska. It is designed to "understand, simulate and control ionospheric processes that might alter the performance of communication and surveillance systems." The HAARP system intends to beam 3.6 Gigawatts of effective radiated power of high frequency radio energy into the ionosphere in order to:

- Generate extremely low frequency (ELF) waves for communicating with submerged submarines
- "Conduct geophysical probes to identify and characterize natural ionospheric processes so that techniques can be developed to mitigate or control them
- Generate ionospheric lenses to focus large amounts of high frequency energy, thus providing a means of triggering ionospheric processes that potentially could be exploited for Department of Defense purposes,
- Electron acceleration for infrared (IR) and other optical

- emissions which could be used to control radio wave propagation properties
- Generate geomagnetic field aligned ionization to control the reflection/scattering properties of radio waves,
- Use oblique heating to produce effects on radio wave propagation, thus broadening the potential military applications of ionospheric enhancement technology.”

#### **E. Mobile HAARP**

“All 3 of the US HAARP Weather Modification systems – the land based system in Alaska, the Sea Based SBX and the mini shuttle X-37B were all built for use as military weather modifying weapons of mass destruction – in direct violation of the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques...” See comprehensive details: [“Obama’s October Surprise – Creating and Steering Hurricane Sandy”, Dane Wigington, 6 Nov 2012, Geo Engineering](#)

“WASHINGTON — The U.S. Navy is moving a sea-based radar platform closer to North Korea to track possible missile launches, a Pentagon official said Monday, in the latest step meant to deter the North and reassure South Korea and Japan that the U.S. is committed to their defense.”

“The sea-based X-band radar, a self-propelled system resembling an oil rig, is heading toward the Korean peninsula from Pearl Harbor, the official said. The John S. McCain, a guided missile destroyer capable of shooting down ballistic missiles, also is being sent to the region, said another Defense Department official.“ Go here: [“U.S. moves missile-tracking radar platform closer to North Korea”, David S. Cloud and Jung-yoon Choi, 1 April 2013, Los Angeles Times,](#)

**F. [“HAARP Technology to Control the Weather”, presentation given by Dr. Nick Begich to the Breakthrough Energy Movement conference, 2012 Holland](#)**

[Note: It’s about mind control and energy weapons. RB]

Dr. Nick Begich is the eldest son of the late United States Congressman from Alaska, Nick Begich Sr., and political activist Pegge Begich. He is well known in Alaska for his own political activities. He was twice elected President of both the Alaska Federation of Teachers and the Anchorage Council of Education. He has been pursuing independent research in the sciences and politics

for most of his adult life. Begich received Doctor of Medicine (Medicina Alternativa), honoris causa, for independent work in health and political science, from The Open International University for Complementary Medicines, Colombo, Sri Lanka, in November 1994. [Website](#)

### **Dr. Benard Eastlund**

Inventor

Bernard J. Eastlund (1938 – December 12, 2007) was a physicist who received his B.S. in physics from MIT and his Ph.D. in physics from Columbia University. In 1970 he received a Special Achievement Certificate from the U. S. Atomic Energy Commission for co-invention of the "fusion torch."

Eastlund authored three patents (US Patents #4,686,605, #4,712,155, and #5,038,664) that, it is claimed, led to the development of the High Frequency Active Auroral Research Program (HAARP).[1]

Eastlund also authored patent US20070238252 [1] 'Cosmic particle ignition of artificially ionized plasma patterns in the atmosphere' which was published a few months before his death. The conclusion section of the patent contains the following text.

"This invention has a phenomenal variety of possible ramifications and potential future developments. As alluded to earlier, a variety of telecommunications systems for improvement of local cellular systems, short haul stand alone cellular systems, city wide cellular systems and long haul

communications systems could result. Two new approaches to weather modification and control are suggested. The first is for manipulation of the steering winds that control the development of mesocyclones, or the modification of the directions of the jet streams that influence development of hurricanes. The second is a method for influencing the electrical charge distribution in weather patterns such as meso-cyclones. Possible defense applications include a method of accelerating electrons to MEV energies in conjunction with the HAARP antenna. Research applications include the creation of bright and controlled guide stars for astrophysical purposes. Thus it can be seen that the ramifications are numerous, far-reaching, and exceedingly varied in usefulness."
